

experience the benefits of **AIDA Servo Presses**

AIDA has been the first company in the world to develop and market direct-drive servo presses, delivering to date over one thousand units worldwide. AIDA Direct Servo Former (DSF) presses are the revolutionary forming systems for the 21st Century. DSF presses are nowadays attracting more and more customers who aim at boosting their productivity and increasing their competitive advantages in the global metalforming industry, while achieving sustainable business development.

At EuroBLECH 2014, AIDA is proud to exhibit one of its state-of-the-art DSF-M2 servo presses, which is part of the complete high performance product portfolio of the company.

DSF-M2-4000 Highlights

- ▶ high rigidity frame
- ▶ AIDA Hydraulic Overload Protection (HOLP)
- ▶ AIDA servo package
- ▶ AIDA Intelligent Operation System (AIOS)

Looking forward to welcoming you at AIDA stand

to experience the benefits of our freely programmable servo technology and its cutting edge functionality.
